Subject: Fwd: GOODSamples - Two seats left in Sampling Training class
Date: Thursday, August 27, 2015 8:55:09 AM

Hi David,

Do you know if you or David M can attend? Chris and I are going to share a slot and I guess that leaves one seat. I am on my way in to the SAT mtg. See you there.

Thanks,
Diana

Do you have some folks who can attend?

I have two seats remaining that can be used by PDP and/or EPA. Do you have contact names?

Nancy

If you have contacts at PDP and EPA, please forward a message on to them (I'll send a message with the details you can forward or copy and paste from! Please copy me if you can so I know where the message is going. The intent of this course is to serve people in the DC area. We have around a dozen FDA at this point. I have lots of interest from the state of MD and I'm deciding how many of them to allow in.

If you have room in the class, how about inviting someone from PDP and someone from EPA? They are both in that area.

How about sending your Sampling Supervisor?

I think I'll pass on that one and try to make the next one. I have AOAC and then BERM and this chapter and then PDP wants me to meet with EPA on sampling in October and I want to meet with Bayer in Carolina on their sampling and plan for a session on sampling at EPRW.

...but I must move the drat chapter forward and at least get a draft to folks so they can help me correct everything. Richard Fussell and Leah Riter said they would contribute and I know that Arpad will want to also, so it will be better to pull a draft together then let them give me input than to just keep delaying.

I find this extremely difficult! Not my thing

Would you be interested in coming to the Sept training again and bring some staff with you? I could pay for your travel (as a WG member). The Irvine training was really great!

I'm anxious to see it too. I just read the 50th year series that Gy wrote. The more I read the more difficult it becomes for me to write but I'm forcing myself to move forward with huge thanks to you and Chuck for the work you have done and allowed me to learn

I can't wait to get the next iteration of GOODSample out to you. It seems to be getting better and better. Maybe by the end of this week. Pitard was generally very complimentary but a couple of his comments led Chuck and I do change the approach in a couple of suggestions. I think you will like it.
